

Drayton Bassett Parish Council

HS2 Update

24 November 2020

Introducing Balfour Beatty VINCI Joint Venture

Balfour Beatty VINCI (BBV) are the main works contractor for this area of the route. Their job is to prepare the final design of the HS2 route and build the railway in preparation for the track and signaling installation.

BBV Programme Update 2020 / 2021

(These dates are subject to change and consent requirements)

Parish of Drayton Bassett

Lichfield District Council
Staffordshire County Council

Programme
(These dates are subject to change and consent requirements)

Parish of Drayton Bassett

2020 – 2021

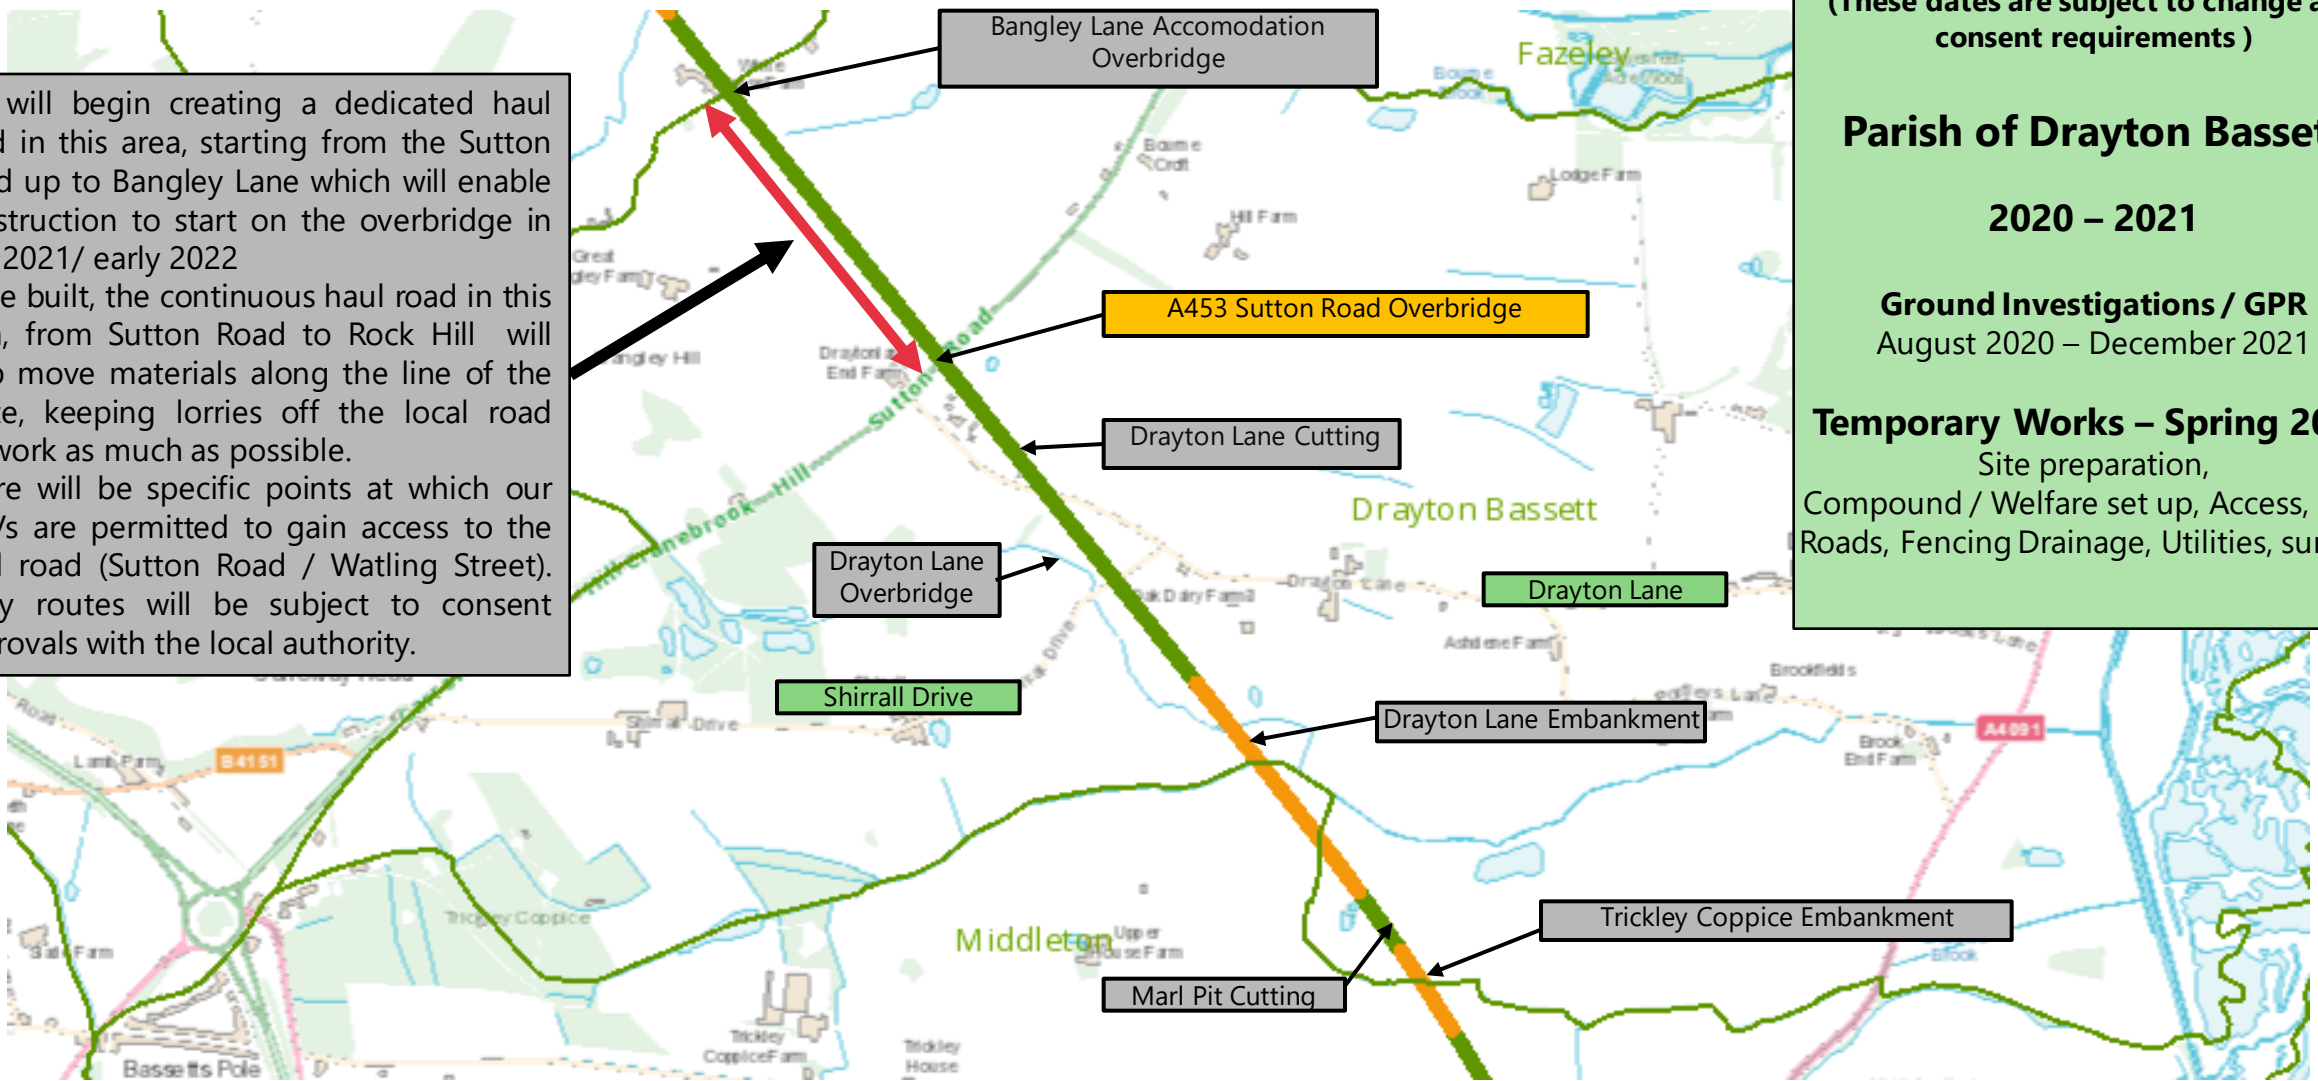

Ground Investigations / GPR
August 2020 – December 2021

Temporary Works – Spring 2021
Site preparation,
Compound / Welfare set up, Access, Haul Roads, Fencing Drainage, Utilities, surveys

We will begin creating a dedicated haul road in this area, starting from the Sutton Road up to Bangley Lane which will enable construction to start on the overbridge in late 2021/ early 2022

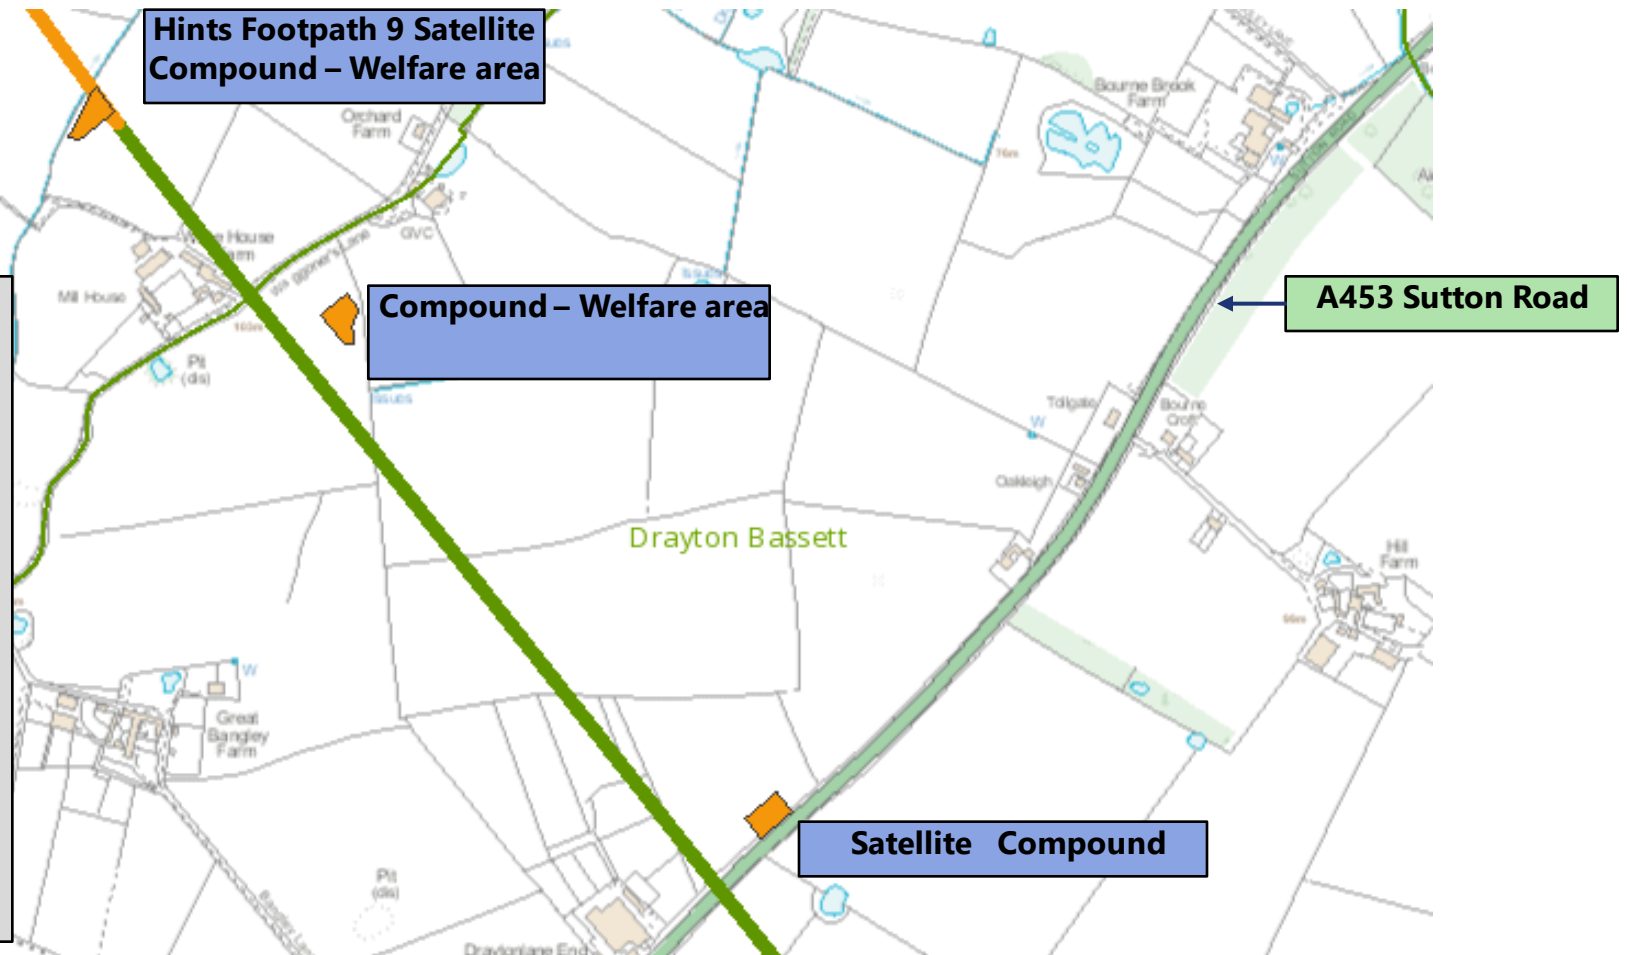

Once built, the continuous haul road in this area, from Sutton Road to Rock Hill will help move materials along the line of the route, keeping lorries off the local road network as much as possible.

There will be specific points at which our HGVs are permitted to gain access to the haul road (Sutton Road / Watling Street). Lorry routes will be subject to consent approvals with the local authority.

Compound locations in Drayton Bassett

- **Satellite Compound** stoned areas providing some office accommodation for a limited number of construction personnel. They will include local storage for plant and materials, welfare facilities, and limited car parking for construction personnel.
- **Welfare areas** stoned areas which will provide some welfare facilities and limited car parking for construction personnel working at that location.

Community Investment – leaving a legacy

BBV's **Community Investment programme** is one of the ways we act as a good neighbour. It allows BBV and our supply chain partners to **give back** to the communities our work impacts through:

- Volunteering support on community projects
- Fundraising support for Charities who are nominated on an annual basis
- Capacity Building – using the skills and knowledge of our teams to support schools, small businesses, etc.

The Community Investment programme **is open to** charities, schools, voluntary sector organisations and constituted bodies who are working in an area which is impacted by our work.

To apply for support through BBV's Community Investment Programme speak **to your local Community Engagement Manager** or email hs2communityengagement@balfourbeattyvinci.com in the first instance. **We will discuss the project idea with you** and help you to complete an application form.

Once the application form is submitted it will be assessed by an internal panel at BBV to see if it is a project that can be delivered by the team with the resources available to them during that period. If your application is successful it will be programmed in and delivered. If unsuccessful the team will let you know and explain the reasons why.

Questions

- Are there any active community groups in the area that may benefit from our Community investment support
- How often do Drayton Bassett Parish Council want to receive updates / meet with us?
- Support to host /promote Virtual Drop-Ins through 2021?

Any Questions?
